

Water-based Full-Color InkJet Printer
for Flexible Packaging

MJP ADVANCED 30X for FILM

with unbeatable quality, print speed, and ease of operation

pushes the boundary of short-run production
in the world of digital flexible packaging

High Speed
80m/min.

High Resolution
1200dpi x
1200dpi

High Density
White

One-Step
Alignment

Dynamic
job change

Advance your efficiency and sustainable future

Improve your business environment by print operation without odor of solvent
while you reduce VOC emission and achieve skill-free operation all at the same time.

MJP ADVANCED 30X main specs

item	description
Printing method	piezo drop-on-demand
Max print width	750mm
Max film width	790mm
Number of colors	KCMY+WW
Printing speed	80m/min.
Film types	PET, OPP(12 to 40μ)
Ink type	water-based pigment ink
Drying method	hot air

main features

- High speed, high productivity**
 The full-color printing speed of 80 meters per min. offers increased efficiency.
- One-Step Alignment**
 simplifies the operation by automatically rendering compensation values to match the position of white with color prints.
- High Density White**
 Double White renders high density background for excellent packaging appearance.
- High Resolution Inkjet Head**
 Photographic images and texts are clear and vivid, thanks to 1200dpi x 1200dpi resolution print heads.
- Dynamic Job Change**
 Continuous sequential output of different job data one after another results in extremely efficient handling of a variety of jobs.

One-Step Alignment

This function allows for quick compensation on film's elongation and contraction by bi-directional alignment between colors and white.

Dynamic Job Change

Different job data of the same size arranged for non-stop printing with dynamic job change leads to huge reduction of film waste between print jobs.

Configuration

Miyakoshi Printing Machinery Co., Ltd.

1-13-5, Tsudanuma Narashino-shi Chiba

275-0016, JAPAN
